SKILLS

Languages Python, , Java, JavaScript, HTML/CSS, SQL, C#

Frameworks React, .NET, Node.js Flask, Next.js, **Developer**

Tools Git, VS Code, Visual Studio

Libraries Pandas

PROJECTS

Pizza Restaurant Management | github.com/falmata7

2023

- Developed a comprehensive Pizza Restaurant Management System using C# and .NET framework, featuring a user-friendly interface with Home, Order, Payment, and Order Queue pages for efficient order processing, payment settlement, and order tracking.
- Implemented object-oriented programming principles to create a seamless flow, allowing users to add items to orders, proceed to checkout, settle bills, and manage order queues, showcasing strong problem-solving and software development skills.

Hackathon Project | github.com/falmata7

2023

- Developed a Python program that manages the scheduling of appointments for a hair salon, including creating a weekly schedule, loading and saving appointments from files, and managing appointments by searching, scheduling, and canceling them.
- Implemented GitHub Auth to get data from user's repositories.
- Visualized GitHub data to show collaboration.

CERTIFICATION & AWARDS

2023 Build a mobile and desktop app with Blazor Hybrid and .NET MAUI - Microsoft.

2023 GitHub Essential Training - LinkedIn
